sustainable management of soils is an important global issue of the 21st century feeding roughly 8 billion people with an environmentally sustainable production system is a major challenge especially considering the fact that 10 of the world's population at risk of hunger and 25 at risk of malnutrition accordingly the 68th united nations general assembly declared 2016 the international year of pulses to raise awareness and to celebrate the role of pulses in human nutrition and welfare likewise the assembly declared the year 2015 as the international year of soils to promote awareness of the role of healthy soils for a healthy life and the international union of soil science iuss has declared 2015 2024 as the international decade of soils including legumes in cropping systems is an important toward advancing soil sustainability food and nutritional security without compromising soil quality or its production potential several textbooks and edited volumes are currently available on general soil fertility or on legumes but to date none have been dedicated to the study of legumes for soil health and sustainable management this is important aspect as the soil the epidermis of the earth geoderma is the major component of the terrestrial biosphere this book explores the impacts of legumes on soil health and sustainability structure and functioning of agro ecosystems agronomic productivity and food security bnf microbial transformation of soil n and p plant growth promoting rhizobacteria biofertilizers etc with the advent of fertilizers legumes have been sidelined since world war ii which has produced serious consequences for soils and the environment alike therefore legume based rational cropping soil management practices must support environmentally and economically sustainable agroecosystems based on sequential rotation and intercropping considerations to restore soil health and sustainability all chapters are amply illustrated with appropriately placed data tables figures and photographs and supported with extensive and cutting edge references the editors have provided a roadmap for the sustainable development of legumes for food and nutritional security and soil sustainability in agricultural systems offering a unique resource for teachers researchers and policymakers as well as undergraduate and graduate students of soil science agronomy ecology and the environmental sciences

agricultural internet of things and decision support for smart farming reveals how a set of key enabling technologies related to agronomic management remote and proximal sensing data mining decision making and automation can be efficiently integrated in one system chapters cover how these enable real time monitoring of soil conditions determine real time site specific requirements of crop systems help develop a decision support system dss aimed at maximizing the efficient use of resources and provide planning for agronomic inputs differentiated in time and space this book is ideal for researchers academics post graduate students and practitioners who want to embrace new agricultural technologies presents the science behind smart technologies for agricultural management reveals the power of data science and how to extract meaningful insights from big data on what is most suitable based on individual time and space proves how advanced technologies used in agriculture practices can become site specific locally adaptive operationally feasible and economically affordable

in recent decades agricultural commodity surpluses in the developed world have contributed to a mantra of land surplus in which set aside extensification alternative land uses and wilding have been key terms in debates over land quite suddenly all this has changed as a consequence of rapidly shifting commodity markets prices for cereals oil seeds and other globally traded commodities have risen sharply a contributor to this has been the shift to bioenergy cropping fuelled by concerns over post peak oil and climate change agricultural supply chain interests have embraced the new environmentalism of climate change with enthusiasm proudly proclaiming the readiness of the industry to produce both food and energy crops and to do so with a neo liberal confidence in markets to determine the balance between food and non food crops in land use but policy and politics have not necessarily caught up with these market and industry led changes and some environmentalists are beginning to challenge the assumptions of the new productivism is it necessarily the case they ask that agriculture's best contribution to tackling climate change is to grow bioenergy crops or invest in anaerobic digesters or make land over for windfarms might not there be an equally important role in maximising the carbon sequestration or water holding properties of biodiverse land what is land for tackles these key cutting edge issues of this new debate by setting out a baseline of evidence and ideas

this open access book includes a selection of contributions from the life cycle management 2019 conference lcm held in poznań poland and presents different examples of scientific and practical contributions showing an incorporation of life cycle approach into the decision processes on strategic and operational level special attention is drawn to applications of lcm to target organize analyze and manage product related information and activities towards continuous improvement along the different products life cycle the selection of case studies presents lcm as a business management approach that can be used by all types of businesses and organizations in order to improve their sustainability performance this book provides a cross sectoral current picture of lcm issues the structure of the book is based on five theme lines the themes represent different objects that are focused on sustainability and lcm practices mainly related to products technologies organizations markets and policy issues as well as methodological solutions the book brings together presentations from the world of science and the world of enterprises as well as institutions supporting economic development
