whales large mysterious intelligent and endangered in 1986 a global moratorium on whaling was issued by the international whaling commission however that decision was not without controversy some countries such as norway continue to whale in defiance of the ban in this fascinating book peter stoett combines ecological sensitivity with a hard assessment of the political realities of the international regime to examine this important issue the international politics of whaling examines contemporary whaling issues with an

emphasis on three factors our knowledge of whales and current whale populations and the impact of whaling the actors and institutions involved in the debate over whaling and the ethical dimension reluctantly he concludes that the current global moratorium on whaling is problematic and that we must focus instead on habitat preservation in order to protect whales more effectively

sub saharan africa is experiencing an impressive measure of economic revivalism that is driven by both national and international forces at the beginning of the twenty first century that political and business leaders in the region are determined that development in this millennium will not mimic the slow pace of growth in the twentieth is a given undoubtedly the rapid spread of information communications technology ict and contemporary investments of china in the region s growth agenda bear this thesis out this book among other things advances the theory that improving human rights practices and the democracy project i e democratic consolidation in sub saharan africa will create an enabling environment that is critical for stimulating the current inspiring development objectives

unnatural states is a radical critique of international theory in particular of the assumption of state agency that states act in the world in their own right peter lomas argues that since the universal states system is inequitable and rigid and not all states are democracies anyway this assumption is unreal and to adopt it means reinforcing an unjust status quo looking at the concepts of state nation and agency lomas sees populations struggling to find an agreed model of the state owing to inherited material differences and unsurprisingly among theorists of the nation only controversy and a great confusion of terms meanwhile the functional incarnations of the state agent are caricatures the mandarin state the lawyer state the landlord state the heir to history state and the patriot state yet recent developments in international theory constructivism scientific realism postmodernism sacrifice state agency only at the price of an unhelpful abstraction the states system is dysfunctional and obsolete lomas contends and international theory must be recast with morality as central to inspire and to guide historic change he focuses in his conclusion on prescriptions for change led by four moral concerns human rights weapons of mass destruction relations between rich and poor societies and the environment i begin this book writes lomas with the commonest commonplace of international theory to expose it as a meaningless cliché in the masterly hands of hobbes it was elaborated into a shock formula for organized society a reading of history as civilization s failure kant sought to rescue morality from hobbes and create the structures of modernity but kant s influence is coming to an end in the cold war politicians disagreeing over another philosopher almost brought the world to an end hence the challenges of our time these are primary and profound philosophers have done much to define the modern world the point of international theory is to change it

coexistence in an atmosphere of mutual respect in a pluralist world order has become an even greater challenge in the practice of international relations since the murderous acts committed by al qaeda on september 11 2001 9 11 that demanded justice this book looks beyond today s popular narratives dr chang explores the extent to which the tragedy of 9 11 has been exploited by the neoconservative controlled u s administration as opportunity to launch its grand strategy for creating an american centric order necessary for the continuation of u s hegemony in the twenty first century specific controversial concerns are

extensively examined within the historical and theoretical context of territoriality and power the state of the american economy the arab israel conflict and the invasion of iraq and its aftermath are treated as interrelated issues and examined in terms of the westernization imperative inherent in the grand strategy that principally requires the containment of an emerging china

this text demonstrates the limits that are inherent in a western approach to thinking about international relations and encourages students to apply domestic political concepts to world politics

many of the basic issues of political science have been addressed by pluralist theory which focuses on the competing interests of a democratic polity their organization and their influence on policy andrew mcfarland shows that this approach still provides a promising foundation for understanding the american political process
