with increased public concern regarding food safety greater demands are placed on risk communicators to involve the public and other interested parties in an interactive dialogue and to explain the magnitude and severity of risks associated with foodborne hazards in clear and comprehensible terms that convey credibility and trustworthiness this requires communicators to recognize and overcome gaps in knowledge as well as obstacles inherent in the uncertainties of scientific risk assessment this document is the report of a joint fao who expert consultation on the application of risk communication to food standards and safety matters was held from 2 6 february 1998 at the italian ministry of health rome

this book provides an innovative insight into the regulatory conundrum of genetically modified organisms gmos deploying transnational legal analysis as a methodological framework to explore the most controversial area of risk governance the book deconstructs hegemonic and counter hegemonic transnational narratives on the governance of gmo risks cutting across us law eu law the wto agreement on sanitary and phytosanitary measures and hybrid standard setting regimes should uncertain risks be run unless adverse effects have been conclusively established and should regulators only act where this is cost benefit effective should risk managers make a convincing case that a product or process is safe enough for the relevant uncertain risks to be socially acceptable how can intractable transnational regulatory conflicts be solved the book complements a close analysis of regulatory frameworks and case law with a more encompassing perspective on the political socio economic and distributional implications of different approaches to the regulation of health and

environmental risks at times of globalisation the gmo deadlock thus becomes a lens through which to investigate the underlying value systems goals and impacts of transnational discourses on risk governance against this backdrop the normative strand of analysis points to the limited ability of science and procedural deliberation to generate authentic agreement and to identify normatively legitimate solutions in the absence of pre existing shared perspectives

when genetically engineered seeds were first deployed in the americas in the mid 1990s the biotechnology industry and its partners envisaged a world in which their crops would be widely accepted as the food of the future critics however raised a variety of social environmental economic and health concerns this book traces the emergence of the 2000 cartagena protocol on biosafety and the discourse of precaution toward geos that the protocol institutionalized internationally peter andrée explains this reversal in the common sense understanding of genetic engineering and discusses the new debates it has engendered
