since its first publication a study of time in indian philosophy has been acclaimed as having successfully shown the simple falsity of such clichés that the indian view of time is cyclic or that it is exclusively illusory given the variety of views discussed in this work it is evident that the theme of time is intimately related to such basic concepts as being and becoming change and causality creation and annihilation it has been therefore observed that this book makes an excellent introduction to the heart of indian thought based on sanskrit source material this book is a unique attempt to presenting a comprehensive review of the widely divergent views about time in indian thought clearly written it succeeds in setting out the issues of discussion pointedly and cogently since the concept of time intervenes with such major concepts as that of causality being and non being etc this book also serves as a general introduction to the classic heart of indian philosophy the author has demonstrated a rare ability to translate technical doctrines from one tradition of thought into the language of another and thus has made it possible for all those who are concerned with the question of time but do not have access in the indian conceptual world to appreciate the contributions of indian thought with regard to this complex question noteworthy is the fact that this book is the first attempt which successfully exposes the simple falsity of such clichés as that the indian view of time is cyclic as opposed to the judaeo christian understanding of linear time a study of time in indian philosophy therefore renders a valuable service to all those who are concerned with cross cultural and inter religious exchange

this is the first monograph devoted solely to the ceramics of cyprus in the hellenistic and roman periods the island was by then no longer divided into kingdoms but unified politically first under ptolemaic egypt and later as a province in the roman empire submission to foreign rule was previously thought to have diluted if not obliterated the time honoured distinctive cypriot character the ceramic evidence suggests otherwise the distribution of local and imported pottery in cyprus points to the existence of several regional exchange networks a division that also seems reflected by other evidence the similarities in material culture exchange patterns and preferential practices are suggestive of a certain level of regional collective self awareness from the 1st century bc onwards cyprus became increasingly engulfed by mass produced and standardized ceramic fine wares which seem ultimately to have put many of the indigenous makers of similar products out of business or forced them to modify their output also the ceramic record gradually became less diverse during the roman period than before developments which we today might be inclined to view as symptoms of an early form of globalisation
