this volume contains the english translation of felix kaufmann s 1895 1945 main work methodenlehre der sozialwissenschaften 1936 in this book kaufmann develops a general theory of knowledge of the social sciences in his role as a cross border commuter between husserl s phenomenology kelsen s pure theory of law and the logical positivism of the vienna circle this multilayered inquiry connects the value oriented reflections of a general philosophy of science with the specificity of the methods and theories of the social sciences as opposed to abstract natural science and psychology the core focus of the study is the attempt to elucidate how and under what conditions scientific knowledge about social facts empirically justified and theoretically embedded can be obtained the empirical basis of knowledge within the social sciences forms a phenomenological concept of experience according to kaufmann this concept of experience exhibits a complex structure within the meaning interpretation of human action as the core of knowledge in the social sciences this structure reaches out across the isolated act of verification toward the synthesis of external and internal experiences the book opens with a detailed and useful introduction by ingeborg k helling which introduces the historical and theoretical background of kaufmann s study and specifically illuminates his relation to alfred schütz and john dewey finally it contains interviews with and letters to members of his family colleagues and students

anyone reflecting on the methodology of legal reasoning faces a difficult task the number of methodological theories in jurisprudence and the vast literature on the subject are not the only problems that have to be taken into account perhaps the most striking difficulty concerning the methodology of legal argument is the heated debate between jurists legal theorists and philosophers of law that has been recurring since at least nineteenth century therefore a justification is needed for writing yet another book concerning the methods of legal reasoning a book that aims to cover a lot of what has already been proposed in legal theory we believe that there is such a justification first the perspective that we adopt in the present book is unique at least

in some respects we venture to look at the methodology of legal reasoning from the outside i e from a more g eral philosophical perspective while taking into account the hard re ity of law this perspective enables us to ask questions about the justification for the methods of legal argument presented second we do not want to defend one paradigmatic conception of legal reasoning on the contrary we put forward the thesis that there is a plurality of argumentative methods the plurality however does not lead to relativism in legal decision making third we reject any hierarchy of the methods of legal reasoning and take the view that one can speak only of the precision and flexibility of different methodologies

the definitive guide to the full spectrum of neurology this is one of the best neurology textbooks available providing the distilled insights and knowledge of some of today s truly outstanding neurologic clinicians like its predecessors the current edition features writing that is clear and concise yet conversational it almost feels as if the reader is on rounds hearing the insights of a truly superb clinician offers a great deal to the serious student of neurology and is well worth the investment this outstanding text will continue to be a key resource for neurologists and neurosurgeons as well as resident trainees in those disciplines many practicing internists emergency physicians and pediatricians will also find it to be an excellent resource jama a doody s core title essential purchase for 2011 4 star doody s review this book should be an essential element in the library of both young and seasoned clinicians this has always been a successfully balanced textbook combining a personal approach to the study of neurology and neurologic diseases this edition now 1572 pages expands on the prior editions admirably it achieves the difficult task of refreshing and updating a classic doody s review service one of the iconic texts in clinical medicine the fact that it is now in its ninth edition attests to its durability and credibility as a comprehensive source for the pathophysiology evaluation and treatment of disorders of the nervous system first published in 1975 it has withstood the enormous changes in neurological sciences during the subsequent decades and has remained a staple on the reference shelves of practitioners from a variety of backgrounds and training levels a unique attribute for a volume of this size is that each chapter is written by the same authors thus achieving a uniformity of voice as a gold standard text the ninth edition of adams and victor s principles of neurology would serve as valuable complement to any medical library world neurosurgery journal adams and victor s principles of neurology provides all the information you will need to confidently handle any neurologic problem from disorders of motility and

derangements of intellect behavior and language to the degenerative and neuromuscular diseases having this gold standard text on your reference shelf is like being able to consult with skilled clinicians on a daily basis more than a compilation of facts adams and victor s delivers expert insights not found in any other resource that help you understand every aspect of neurological disease written in a conversational style the text offers practical yet in depth coverage of both common and rare illnesses adams and victor s principles of neurology also includes timely complete and accessible treatment and clinical management strategies features balanced presentation of evidence based research coupled with the perspectives and experience of world renowned expert neurologists logical six part organization reviews the clinical method cardinal presentations diseases of the central nervous system diseases of the peripheral nervous system and psychiatric disorders a to z coverage of cardinal manifestations including disorders of the special senses epilepsy and disorders of consciousness disorders of energy mood autonomic and endocrine functions and neuromuscular spinal cord and psychiatric disease focus on symptoms etiology diagnosis and treatment offers complete practical guidance in clinical practice special section on growth development and aging related to neurologic disease presents the latest cutting edge research in this integral area
