an introduction to probability and statistics an introduction to probability and statistics first edition guides the readers through basic probability and statistical methods along with graphs and tables and helps to analyse critically about various basic concepts written by two friends i e dr arun kaushik and dr rajwant k singh this book introduces readers with no or very little prior knowledge in probability or statistics to a thinking process to help them obtain the best solution to a posed situation it provides lots of examples for each topic discussed and examples are covered from the medical field giving the reader more exposure in applying statistical methods to different situations this text contains an enhanced number of exercises and graphical illustrations to motivate the readers and demonstrate the applicability of probability and statistical inference in a vast variety of human activities each section includes relevant proofs where ever need arises followed by exercises with some useful clues to their solutions furthermore if the need arises then the detailed solutions to all exercises will be provided in near future in an answers manual this text will appeal to advanced undergraduate and graduate students as well as researchers and practitioners in engineering medical sciences business social sciences or agriculture the material discussed in this book is enough for undergraduate and graduate courses it consists of 5 chapters chapter 1 is devoted to the basic concept of probability chapters 2 and 3 deal with the concept of a random variable and its distribution and related topics chapters 4 and 5 presents an overview of statistical inference discuss the standard topics of parametric statistical inference namely point estimation interval estimation and testing hypotheses

life mimics a marathon more than it does a sprint obvious as that may appear as proud and ambitious parents we often push our children to excel in ways that may help them achieve some early successes but may sap their stamina to endure the more difficult challenges which life may throw at them what is more our obsessive rush to get our children off to a good start overlooks the fact that in life as in a marathon an early lead hardly matters but being too intent on coming first may leave our children lacking in many of the life skilld that a normal childhood would teach them v raghunathan best selling author of games indians play offers an alternative approach that can be even more rewarding life he avers is not a sprint and it does not in the long run matter very much if you missed out on the best school college or job as starters as long as you give yourself the time to develop your personality and skills you will still get where you want at your own pace and perhaps far more happily to illustrate based far

more happily to illustrate based on first hand interactions he gives numerous examples of many achievers famous and not so famous among them n r narayana murthy dr kallam anji reddy dr p d k rao v mani ashwini nachappa ila bhatt and g m rao for those helping their children along for success in life or rethinking their children along for success in life or rethinking their own approach to it don t sprint the marathon will prove an invaluable guide

integrates science and social studies content through exciting reading that teaches comprehension fluency and vocabulary delivers standards based instruction units can be taught in any order

synthesizing ideas from event semantics and psycholinguistics this monograph provides a new perspective on the processing of linguistic aspect and aspectual coercion confronting alternative semantic accounts with experimental evidence the author develops a comprehensive model of online aspectual interpretation the first part of the book critically reviews competing theoretical accounts of aspectual coercion as an analytical tool the author introduces a computational model based on the event calculus by hamm van lambalgen 2005 which makes use of planning formalisms from artificial intelligence detailed predictions from this framework are then tested in the experimental work reported in the second part the focus here is on such questions as is aspectual coercion a uniform phenomenon or must we distinguish different types is aspect processed incrementally or is it computed only at the clause boundary and finally what insights can event related potentials yield about how the brain resolves local aspectual mismatch

a state of the art look at the pathophysiology diagnosis and treatment of running injuries with contributions from numerous national authorities includes unique contemporary coverage of nutritional needs cholesterol and heart disease and the female runner the editor is both a well regarded physician of sports medicine and a long distance runner

dozens of realistic orthopedic cases help physical therapy students make the transition from classroom to clinic physical therapy case files orthopedics delivers approximately 35 orthopedics cases that help students sharpen their critical thinking skills and prepare them for real world practice clinicians will find the book to be a valuable refresher each case includes clinical tips evidence based practice recommendations analysis and references features national physical therapy examination style review questions accompany each case to prepare students for the boards provides students with practical experience before working with patients spares instructors from having to create their own cases analysis of case will include remediation content so students don t have to go a textbook for answers

perhaps more than any other single initiative response to intervention is likely to restructure how middle and high school teachers teach in a very profound way this timely and targeted resource discusses the innovations of rti differentiated instruction and instructional technologies based on numerous real world case studies this book explores solutions for the

complex challenges the rti implementation process brings

this new addition to our case file series features 45 clinical scenarios with 13 open ended questions weaving biochemistry concepts into the clinical scenarios and a 35 page discussion of the basic science concepts including definitions and pathophysiology 35 usmle style review questions follow each case and biochemistry pearls at the end of each chapter highlight key points and enable quick study before exams

allow students to step back in time to experience the thoughts feelings dilemmas and actions of people from history for each history topic miller suggests two titles one for use with the entire class and one for use with small reading groups summaries of the books author information activities and topics for discussion are supplemented with vocabulary lists and ideas for research topics and further reading this integrated approach makes history meaningful to students and helps them retain historical details and facts

running as the vehicle for enlightenment

successful speaking and understanding requires mechanisms for reliably encoding structured linguistic representations in memory and for effectively accessing information in those representations later studying the time course of real time linguistic dependency formation provides a valuable tool for uncovering the cognitive and neural basis of these mechanisms this volume draws together multiple perspectives on encoding and navigating structured linguistic representations to highlight important empirical insights and to identify key priorities for new research in this area
